**Current Type:**

Ac

**Ac Voltage Rating:**

Between 115.0 volts and 240.0 volts

**Frequency Rating:**

Between 47.0 hertz and 63.0 hertz

**End Application:**

An/fnq-1 (v) 2 wind measuring set

**Accessory Components And Quantity:**

05159-66 nose cone and prop shaftassy 1, 05154-45 housing assembly 1, 05120e-56 mounting post and transducer assembly 1, 05128b orientation ring 1

**Wind Speed Transmission Method:**

Ethermoelement

**Wind Direction Transmission Method:**

Thermoelement

**Wind Speed Rotor Type:**

Blade

**Wind Speed Rotor Material:**

Plastic

**Wind Direction Component Type:**

Airplane-shaped vane

**Wind Direction Component Material:**

Plastic

**Product Name:**

Wind monitor

**Phase:**

Single

**Special Features:**

Measures wind direction 0-360 degaccuracy 3 degrees signal out put dc, measurers wind speed 0-117 knots, operating temp range c degrees m62/p54, 5-100 % humidity, survives ice 0.5 in hr, rain 3 in/hr with 40 knot winds, height 14.6 inch, length 21.7 inch, replaces 6660-01-5304 pn 8111-1004-1

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T206-f
