End Application:

6660-01-428-9218; pn 95008a0000; meteorological station group

Product Name:

Balloon, meteorological

Special Features:

3.0cm neck diameter; 12.0cm neck length; 86.0cm flaccid body length; 55.0cm barely inflated diameter; 250.0gr payload; 510.0gr recommended free lift; 760.0gr nozzle lift; 960.0gr gross lift; 117.0cm diameter at release

Color:

Uncolored

Material:

Rubber, latex

Material:

Rubber

Supplementary Features:

0.83 cu m volume at release; 320.0m min rate of ascent; 300.0cm diameter at burst; 21.2km bursting altitude; 45.3hpa bursting pressure; rotationally molded balloon; integral balloon neck; multilayered latex film; bursts with over 60 particles

Weight:

200.0 grams

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T206-h
