Model Number:

8339

Product Name:

Detector, cloud height

Special Features:

Measurement range to 25,000 ft, cloud layers : up to 4 layers, measurement cycle is 30, 60, 120 second sampling/reporting interval, lidar: pulsed diode, ingaas, wavelength is 905nm, power 95-240vac, frequency 47-64hz, battery back up, 19 inch high by 9 inch deep by 16 inch wide

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
