**Model Number:**

8339

**Product Name:**

Detector, cloud height

**Special Features:**

Measurement range to 25,000 ft, cloud layers : up to 4 layers, measurement cycle is 30, 60, 120 second sampling/reporting interval, lidar: pulsed diode, ingaas, wavelength is 905nm, power 95-240vac, frequency 47-64hz, battery back up, 19 inch high by 9 inch deep by 16 inch wide

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A23800
