End Application:

An/tmq-52d

Unpackaged Unit Length:

193.500 inches

Unpackaged Unit Width:

86.000 inches

Unpackaged Unit Height:

100.000 inches

Joint Electronics Type Designation System Item Name:

Meteorological measuring set

Joint Electronics Type Designation System Item Type Number:

An/tmq-52d

Unpackaged Unit Weight:

10321.000 pounds

Special Features:

Mounting data: profiler system is housed in the command post platform (cpp) shelter and mounted using army standard hardware devices,
material: hi-impact plastic and metal

Functional Description:

The profiler system will provide a modernized realtime meteorological capability over an extended battlespace. Profiler will provide vital target area meteorological information for the employment of smart weapons, ensuring proper munition selection and optimal aim point calculation

Relationship To Similar Equipment:

With all previous models: an/tmq-52b. The d version is an updated version fo the an/tmq-52b to add gbs and remove t-vsats (due to end of life of t-vsats) via the mwo process

Security Classification:

Unclassified

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A23800
