Automatic Chemical Agent Alarm - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/6665-00-169-1454

Alternating Current Rating In Amps:
1.5
Ac Voltage Rating:
Between 110.0 volts and 220.0 volts
Dc Voltage Rating:
28.0 volts
Frequency Rating:
Between 50.0 hertz and 400.0 hertz
Usage Design:
Field
Component And Quantity:
Alarm unit, chemical agent automatic alarm, m42, /fsn6665-859-2215/ 1; battery, dry /ba3517/, /fsn6135-450-3528/ 1; battery, dry /ba3202/,
/fsn6135-935-8738/ 4; detector unit, chemical agent automatic alarm, m43, /fsn6665-859-2201/ 1; installation kit, chemical agent automatic
alarm, for 2-1/2 ton truck, /fsn6665-479-2718/ 1; mounting kit, chemical agent automatic alarm, m228, high profile /fsn6665-859-2212/ 1;
power supply, chemical agent automatic alarm, m10, /fsn6665-859-2225/ 1; refill kit, chemical agent automatic alarm, m229,
/fsn6665-859-2214/ 1
Internal Battery Accommodation:
Not included
Specific Usage Design:
Samples air continuously, which is automatically heated /if necessary/, filtered, drawn into the detector cell, where it passes through the
electrolyte solution. If v or g agents are present, the galvanic voltage produced by the cell increases. The change is amplified by the
electronic module which sounds the detector horn and/or activates a flashing light, applies power to the remote terminals and stops the pump
motor. The horn will continue to sound and/or the light flash until the detector is reset or disconnected by the operator. The system is
designed for manpack, fixed emplacement and vehicular use. Dry cell battery is used for manpack application. M10 power supply is used for
fixed emplacement appl. Mounting kit and installation kit are used for 2-1/2 ton truck appl
Indicator Type:
Flashing red light and horn
Design Type:
Nontripod mounting
Media Detected:
G chemical agent
Phase:
Single
Special Features:
Also detects v chemical agent andcan be used on vehicles
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:

Fiig:

T394-a

Yes - demil/mli
