Overall Length:

6.500 inches

Overall Height:

3.875 inches

Overall Width:

3.500 inches

Case Material:

Tungsten

Radiation Type And Function:

Beta rays detects

Radiation Energy Rating:

5000.0 milliroentgens per hour

Detecting Element Type:

Any acceptable

Detecting Element Detachability:

Detachable

Voltage Rating:

Between 850.0 volts and 950.0 volts

Plateau Length Voltage In Volts:

100.0

Preamplifier:

Not included

Photomultiplier:

Not included

Connector:

Included

Cable:

Not included

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T132-a
