Radiation Type And Function:

Gamma rays detects

Special Features:

Jall wiring is rated at 5000 vdc, reuseable silica gel desiccant in top canister may be reactivated at temperatures up to 260 degrees c, sensitive volume 1.68 liters, electrostatic field 900 vdc, power suppy is battery

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T132-a
