Ac Voltage Rating:

Between 110.0 volts and 220.0 volts

Frequency Rating:

Between 50.0 hertz and 60.0 hertz

End Application:

Water purification equipment set

Electrical Power Source Relationship:

Alternate operating

Usage Design:

Field

Specific Usage Design:

Detects carbon monoxide level in enclosed environment and to sound alarm in the event level exceeds set point

Indicator Type:

Buzzer and red light

Design Type:

Nontripod mounting

Media Detected:

Carbon monoxide

Phase:

Single

Special Features:

Readout 3 full digits, red led, 0.6 inches high; alarm 2 levels, first level is warning light and audible alarm; one relay for each alarm level; length 11.500 inches, width 8.380 inches, height 4.250 inches

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T394-a
