End Application:

Kd930 oxygen detection and monitoring system

Usage Design:

Monitors excessive oxygen in process streams

Detecting Element Type:

Solid state

Detecting Element Detachability:

Integral

Voltage Rating:

12.0 volts

Preamplifier:

Included

Criticality Code Justification:

Feat and alcd

Special Features:

2.500 in. W; 5.250 in. H; 9.188 in. Lg; zero to five pct/zero to twenty-five pct oxygen range; standard relays; on/off pilot switch (green); fail light (blue); twenty-five pct switch (amber); alarm light (red); alarm reset; indicating meter

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T132-a
