Ac Voltage Rating:

120.0 volts and 230.0 volts

Frequency Rating:

60.0 hertz and 50.0 hertz

Usage Design:

Shipboard and industrial

Specific Usage Design:

Continuous monitoring of combustible gasses, hydrogen sulfide and oxygen levels

Indicator Type:

Red light

Design Type:

Nontripod mounting

Media Detected:

Combustible gas and oxygen

Special Features:

Wall mounted; single channel; (1) meter; I.E.D. Indicators: ready (green), fail (blue), warn (yellow) and alarm (red).

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T394-a
