**Detecting Element Type:**

Chemical reaction

**Special Features:**

Hermetically sealed glass tube used to measure petroleum hydrocarbons (n-octane); measuring range: 10-300 ppm; filled with inert carrier material which has been impregnated with a reagent designed to produce a colormetric indication; for use with draeger detector pump model 31 p/n 6726065

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T132-a
