Detecting Element Type:

Chemical reaction

Special Features:

Hermetically sealed glass tube used to measure petroleum hydrocarbons (n-octane); measuring range: 10-300 ppm; filled with inert carrier material which has been impregnated with a reagent designed to produce a colormetric indication; for use with draeger detector pump model 31 p/n 6726065

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T132-a
