Detecting Element Type:

Chemical reaction

Special Features:

Hermetically sealed glass tube used to measure chloroform levels; measuring range: 2-10 ppm; filled with an inert carerier material which has been impregnated with a reagent so as to produce a colorimetric indication; use with draeger pump model 31 p/n 6726065; 5 tubes per pg

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T132-a
