Case Material:

Metal

Detecting Element Detachability:

Integral

Voltage Rating:

120.0 volts

Special Features:

Infrared detection system; multiple gas monitoring in one unit; monitors up to 7 areas, expandable to 31 areas with expansion module; compliance with 3 relay output for alarm, spill alarm, and fault indication; parallel printer output; daily automatic recording of peak ppm; operating parameters may be set manually through front panel or by using a pc and set-up software included on system diskette; self diagnostic error codes for troubleshooting; all software programming and gas menu data contained on 3-1/2 in. Floppy disk; expansion modules can be added with no equipment modification required; 7 digit led display; front panel display

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T132-a
