End Application:

Trident electric power conversion equipment

Current Rating:

68.000 milliamperes

Voltage In Volts And Current Type:

24.0 dc

Special Features:

Volume control: 0-20db adjustment; flash energy-0.7 joules; flash frequency-60 per minute; operating temperature: -10 degrees centigrade to 55 degrees centigrade

General Description:

Audio-visual warning system; beacon and sounder

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
