Product Name:

Polyurethane foam sampling system

Exterior Container Weight:

6.00 pounds

Special Features:

Includes: blower/motor assembly; dual sampling module with glass cartridge; flow venturi; voltage variator/elapsed time indicator; magnehelic gage; seven-day skip timer and anodized aluminum shelter; 110 vac; complete air sampling system designed to simultaneously collect suspended airborne particulates as well as trap airborne vapors at flow rates up to 280 liters per minute

Unit Of Issue Cube:

1.50 cubic feet

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
