End Application:

FORU-SE-WIT-HDRA

Product Name:

Tube detection cyanide range of measurement 2 to 15 mg/m³ 10s

Special Features:

For determination of potassium and/or sodium cyanide aerosols in air or technical gases. Tube contains a reagent ampoule with colorless liquid, a separating layer and yellow indicating layer which changes color to red when in contact with cyanides

General Description:

Range of measurement: 2 to 15 mg/m³; relative standard deviation: 20 to 30%

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
