End Application:

Nsn restricted to nexrad use only; tps

Detecting Element Type:

Any acceptable

Detecting Element Detachability:

Integral

Voltage Rating:

250.0 volts

Special Features:

3pro-alarm; sensor is composed of tin oxide; with 1 pct volume at the sensor, the internal relay will be activated and a yellow led will be lit; at 2 pct hydrogen concentrations the internal 80db alarm will sound along with the lighting of the led

Functional Description:

Used to detect hydrogen gas

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T132-a
