Overall Length:

9.750 inches

Overall Height:

10.750 inches

Overall Width:

8.250 inches

Product Name:

Calibrator air flow venturi for 5-50 cfm calibration

Special Features:

Precision digital microprocessor controlled air flow calibrator utilizing a venturi flow sensor; operating temperature: 40-104 degree f; power requirements: 220-240 vac, 50/60hz; storage temp.: 32-158 degrees f; includes: flow sensor venturi tube, standardization correction for temp. And barometric pressure, 4digit lcd display; to use with the adpcal lv air sampler adapter, for the 5-50 cfm calibratons, 2% full accuracy

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
