**End Application:**

Pantera targeting pod

**Special Features:**

Converts midwave infrared radiation into digital pixel data that is transmitted to processing electronics via a hot link; it contains the focal plane array in a dewar, fpa interface electronics, cooler, cooler controller electronics and a single optical element; optical configuration provides an lru interface in collimated optical space

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A23800
