End Application:

Pantera targeting pod

Special Features:

Converts midwave infrared radiation into digital pixel data that is transmitted to processing electronics via a hot link; it contains the focal plane array in a dewar, fpa interface electronics, cooler, cooler controller electronics and a single optical element; optical configuration provides an lru interface in collimated optical space

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23800
