Ac Voltage Rating:
Between 110.0 volts and 240.0 volts
Frequency Rating:
Between 50.0 hertz and 60.0 hertz
End Application:
Ds1000 docking station
Electrical Power Source Relationship:
Operating
Test Type For Which Designed:
Automatically calibrates monitors, provides instrument diagnostics, automatic data storage, record keeping, and ni-cad battery recharging
Product Name:
Inavy)ds1000 mstr control
Special Features:
D6 standard gas inputs upt to 2500 psig; up to 12 optional pressure transducer inputs accepting pressure range 0 to 2500 psig; pc w/400
mhz and 64mb ram or highter; windows nt 4.0, 98, 2000, xp, or me
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
Yes - demil/mli
