**Overall Height:**

12.000 inches

**Overall Width:**

10.500 inches

**Case Material:**

Aluminum

**End Application:**

Radiac program

**Special Features:**

Gamma source: cesium-137 located behind a 1/4-inch diameter opening. radioactivity content is 9.0 microcuries; beta source: technetium-99 located behind a 1 3/4-inch diameter opening. radioactivity content is 450 picacuries

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

T132-b
