Special Features:

Multi-stage wetted-wall cyclone with enhanced particulate collection; 325 lpm air collection rate; uses 30, 000 hour life brushless fan; 1-10um particulate collection range; 65, 000/min concentration ratio; 4-6cc liquid inventory range; 1 liter on-board make-up water reservoir; portable; extracts particulates and water soluble chemical vapors from air and transfers them to a liquid phase for later detection and analysis

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
