Overall Length:

9.750 inches

Overall Height:

2.750 inches

Overall Width:

2.680 inches

Case Material:

Plastic

Radiation Type And Function:

Beta rays detects

Detecting Element Type:

Geiger-mueller tube

Case Window:

Included

Product Name:

Pancake probe pgm

Special Features:

Designed for contamination surveys on personnel, table tops, floors, and equipment; operating voltage: 900 +/- 50 vdc; temperature range: -30 to 75 degrees c; mica window thickness: 1.4 to 2.0 mg/ sq cm; mica window size: 4.45 cm dia; active area 2.4 sq in; connector: bnc; weight: 0.5 lb; dead time: 50 microsec max

Material:

Mica

Material:

Mica

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T132-a
