Overall Length:

4.650 inches

Overall Height:

1.900 inches

Overall Width:

3.000 inches

Detecting Element Type:

Photo-ionization, catalytic-bead, electrochemical

Detecting Element Detachability:

Detachable

Voltage Rating:

120.0 pounds per hour wet

Preamplifier:

Not included

Connector:

Included

Product Name:

Multiple-gas monitor

Special Features:

Rechargeable li-ion and alkaline battery packs; 2-line 16 digit lcd; buzzer and flashing red led warning; 20, 000 points datalogging; 2-speed vacuum pump; -20 to +45 degrees c operating temperature; case includes monitor, sensors, batteries, filters, and other accessories

Functional Description:

Programmable multiple-gas monitor designed to provide continuous exposure monitoring of toxic organic and inorganic gases, oxygen and combustible gases for workers in hazardous environments

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T132-a
