Overall Length:

7.700 inches

Overall Width:

4.500 inches

Special Features:

Raman instrument for rapid, accurate identification of unknown chemicals including: explosives, toxic chemicals, chemical warfare agents, narcotics, precursors, white powers and more, can be used with fixed probe or mounted to select robots, external power supply: dc wall adapter 12v, 1.25a, operating temperature : -20 degrees to +40 degrees celsius.Item is 7.7 x 4.5 x 2.4 inch, laser output: power adjustable 75mw, 125mw, 250mw, battery: removable and rechargeable lithiumion battery or 123a (eg surefire) batteries>4 hr operation

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T132-a
