Product Name:

Tritium column 75-150u 2ml 200s

Special Features:

Tritium columns for liquid scintillator counter, lsc, water sample preparation; designed to replace distillation for most routine tritium analyses of aqueous samples; removes potential interferences in the lsc spectrum, just as distillation does; not intended to be an enrichment procedure; should only be used in situations when required detection limit can be achieved by direct counting of a 5-10 ml aliquot of sample, plus cocktail, processed through column; component: diphonix resin, target: cations, capacity: 0.8 meq; component: anion exchange resin, target: anions, capacity: 0.8 meq, component: polymethacrylate resin, target: organic molecules, capacity: 50 mg; package of 200

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
