Overall Length:

3.10 inches

Overall Height:

1.00 inches

Radiation Type And Function:

Gamma rays detects and neutron rays detects

Connector:

Included

Cable:

Included

Product Name:

Handheld search and isotope identification device

Special Features:

Identifies radionuclides and classifies them as medical, industrial, naturally occurring radioactive materials and special nuclear materials; gamma and neutron independent measuring channels; very high sensitivity and fast response; LCD display and backlight; visual and audible alarms; wireless communication interface; energy range: 30 keV to 3 MeV (gamma and x-rays), 0.25 eV to 15 MeV (neutrons); includes: shoulder strap, USB cable, transportation case, software and power supply/charger/wall or car cradle; operates with 6 AA batteries; battery life, 24 hours; 52.9 ounces; EMI, shock, vibration and drop resistant; water protection (IP54)

Shelf Life:

N/A

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T132-a
