Product Name:

Spectrometer

Special Features:

Thermo scientific hand-held raman chemical identification system for solids and liquids with built in computer and libraries of materials (over 12, 00 0 items) including white powders, explosives, narcotics and precursors, toxic compounds, military explosives, wmd and chemical warfare agents unit is shockproof, waterproof, military specified for shock, vibration, humidity and temperture unit features a fixed semi-rigid flexible fiberoptic sampling probe, ideal for eod applications, with a built-in beamstop/vial holder

Specification Data:

96906-mil-std 810g and i+67 government standard

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T158-j
