Mounting Type:

Portable

Maximum Weight Capacity:

150000.0 pounds

Scale Type:

Weighing

Functional Description:

Used to determine weights of aircraft from the forces exerted at each of three jack points. From this data the center of gravity is calculated. The weight received by each cell at its respective jack point is transmitted through connecting cables to the indicator unit where the weight, in pounds, is obtained by summing the readings on the weight dial and initial load switch

Reference Data And Literature:

Revere corp. Of america p/n c-43680 and t.O. 35b2-2-2-54 model c1b

Supplementary Features:

Power input 110 vac or 24 vdc, accuracy porm 0.1 percent; includes carrying case, cells, cables, adapters, and accessories

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T137-a
