Mounting Type:

Crane

Maximum Weight Capacity:

20000.0 pounds

End Application:

C-17 aircraft engine change

Indicator Type:

Digital readout

Scale Type:

Weighing

Load Receiver Type:

Hook

Load Receiver Material:

Steel

Counterpoise Weight:

Not included

Wheel:

Not provided

Display Type:

Light emitting diode

Display Digit Quantity:

5

Special Features:

0.05 pct display accuracy rated load; hi performance 4mhz microcontroller processes 2 million instructions per second; high visibili type 1 inch numeric leds are used in the remote indicator; on 500-20, 00lb units the standard practice is to furnish a top lifting eye and a bottom hook with safety latch; 19"lx19"wx16"h (crane unit case); 18"lx16"wx12"h (remote indicator case); crane unit with case is 90lbs; remote indicator with case is 24lbs; steel/best commercial finish, case molded plastic/green; operating temp -15 to 110 degrees f; manufacturer name scale-engine r&r preload indicating

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
