Mounting Type:

Fixed holding loop and large open hook

Overall Length:

10.375 inches

End Application:

Nuclear reactor boundary area

Scale Type:

Weighing

Product Name:

In series tubular linear scale; scale, tubular

Special Features:

Linear scale; heavy-gauge solid brass construction with precision steel springs for outstanding reliability, including salt water applications; avoirdupois and metric graduations deeply embossed for easy reading; zero/tare knob is standard; fixed holding loop and large open hook

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T137-a
