General Description:

Portable, solid-state, electro-optical distance and angle measuring equipment. Distances measured by diode-emitted infrared modulated light waves. Angles measured by electronic measurement. High angle accuracy 0.3 mgon (3cc) with resolution of 0.1 mgon (1cc), high distance accuracy \pm (2mm + 3ppm) short range 7km, electronic level, alphanumeric keyboard, large display 4-line with 20 characters per line, built-in hard disk, software included

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23900
