Model Number:

2100-15

Special Features:

Ultrasonic ranging and data system detects, measure and maps radioactive contamination and radiation dose rates; uses rae: terrain conductivity, x-ray fluorescence, also is designed to be easily interfaced to most other measurement instruments such as magnetometers, gradiometers, vapor detectors, noise meter, light meter, etc.Usrads can be arranged on all-terrian vehicle using multiple detectors to allow for larger survey areas.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
