Case Material:

Fiberglass

Carrying Case:

Provided

Operation Method:

Hand held or tripod mtd transducer headscoops air velocity or mass flow rate, transmitted to readout on digital display

Scale Range:

+0.0 to 1999.0 feet per minute and +0.0 to 200.0 feet per second

Special Features:

P0.0/p150.0 standard cfm mass flow range

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T179-c
