**Case Material:**

Fiberglass

**Carrying Case:**

Provided

**Operation Method:**

Hand held or tripod mtd transducer headscoops air velocity or mass flow rate, transmitted to readout on digital display

**Scale Range:**

+0.0 to 1999.0 feet per minute and +0.0 to 200.0 feet per second

**Special Features:**

P0.0/p150.0 standard cfm mass flow range

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T179-c
