Overall Length:

50.000 inches

Overall Height:

30.000 inches

Overall Width:

30.000 inches

End Application:

Engine test cell

Features Provided:

Encapsulated

Component Type And Quantity:

Display and delay line

Special Features:

An x-y recorder mounted in an air purged explosion proof housing, time delay which ensures all explosive vapors are removed, provides visual and recorded information about the fuel control assembly at start-up, speed, time, acceleration, deceleration, fuel flows at idle and start-up

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A511I0
