**End Application:**

Engineering studies of transient events

**Component Type And Quantity:**

Display

**Special Features:**

Dual channel, signal averaging, split time base, 4k memory, sampling rate, used for engineering research for dynamic distortion of air flows in aircraft inlets, combustors, compressor blades, starting transients, lasers

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A51110
