Overall Length:

11.625 inches

Overall Height:

6.250 inches

Overall Width:

7.250 inches

Indicator Type:

Digital readout

Voltage Rating In Volts:

Between 115.0 ac and 230.0 ac

Accuracy Range In Percent:

-1.0/+1.0

Special Features:

Designed for observing a periodic or varying motion such as rotation or vibration by creating the optical illusion of slowing down or stopping the motion of an object being viewed; test set, elect. Equip.; consists of a portable stroboscopic tachometer with a flashing range of 100 to 25000 fpm for slow and stop motion analysis of moving mechanisms; contains a 4 digit readout of flash rate; weight: 5 lbs; external sync; candella intensities: 500, 000

Specification Or Standard:

2 type and 5 class and e style

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A501k0
