Ac Voltage Rating:

120.0 volts

Frequency Rating:

60.0 hertz

Electrical Power Source Relationship:

Operating

Inclosure Feature:

Single item w/housing

Test Type For Which Designed:

Simulate the output of a mechanically driven tach generator

Phase:

Single

Special Features:

Frequency range 2.0 hz to 90 hz; output connector: 2 pin, conforming to mil-c-5015 on front panel; freq indication: 4 digit digital freq. Meter with 60 x freq multiplier to provide direct reading in rpm; freq adjustment by front panel control or by application of remote dc signal of 0-10 volts; the output frequency of the unit is converted to rpm and read directly on an led panel indicator

Functional Description:

A 30 power source that provides an output similar to a tach generator where the output voltage is proportional to the output frequency

Height:

5.250 inches

Supplementary Features:

Manufacturers name: tach generator simulator

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T228-a
