**Ac Voltage Rating:**

120.0 volts

**Frequency Rating:**

60.0 hertz

**Electrical Power Source Relationship:**

Operating

**Inclosure Feature:**

Single item w/housing

**Test Type For Which Designed:**

Simulate the output of a mechanically driven tach generator

**Phase:**

Single

**Special Features:**

Frequency range 2.0 hz to 90 hz; output connector: 2 pin, conforming to mil-c-5015 on front panel; freq indication: 4 digit digital freq. Meter with 60 x freq multiplier to provide direct reading in rpm; freq adjustment by front panel control or by application of remote dc signal of 0-10 volts; the output frequency of the unit is converted to rpm and read directly on an led panel indicator

**Functional Description:**

A 30 power source that provides an output similar to a tach generator where the output voltage is proportional to the output frequency

**Height:**

5.250 inches

**Supplementary Features:**

Manufacturers name: tach generator simulator

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

T228-a
