Overall Depth:

6.500 inches

Overall Height:

3.000 inches

Overall Width:

10.000 inches

Special Features:

Includes display 120 degrees scale indicator, double scale, linearity +/- 2%; magnetic velocity pickups; power 110 vac 50-400 hz 1 amp, power consumption less than 7 watts

Functional Description:

Offers a simple means to help determine engine condition; detect high vibration from imbalance, bearing wear and other types of mechanical deterioration; allows inputs from velocity transducers of varied sensitivities; displays are in terms of velocity or displacement

Supplementary Features:

Manufacturers name: vibration monitor

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T01200
