Body Material:

Steel, corrosion resisting

Maximum Operating Pressure:

35.0 pounds per square inch

Actuation Method:

Turbine

Inlet Connection Size:

1.000 in. Od.

Inlet Flange Shape:

Round

Outlet Flange Shape:

Round

Liquid Flow Rate:

60.0 gallons per minute

Outlet Connection Size:

1.000 in od.

Special Features:

Explosion proof housing, iron alloy; cover material aluminum alloy; output frequency 500.0 hertz per second max; female conduit thread 1/2-14npt; output current range 4.20 milliamps.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T134-d
