**Body Material:**

Steel, corrosion resisting

**Maximum Operating Pressure:**

35.0 pounds per square inch

**Actuation Method:**

Turbine

**Inlet Connection Size:**

1.000 in. Od.

**Inlet Flange Shape:**

Round

**Outlet Flange Shape:**

Round

**Liquid Flow Rate:**

60.0 gallons per minute

**Outlet Connection Size:**

1.000 in od.

**Special Features:**

Explosion proof housing, iron alloy; cover material aluminum alloy; output frequency 500.0 hertz per second max; female conduit thread 1/2-14npt; output current range 4.20 milliamps.

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

T134-d
