End Application:

Peacekeeper missile guidance control systems

Functional Description:

Compensates for inherent non-linearities of turbine flowmeters

General Description:

Input power 115 vac; 0.5 to 3.5 khz input frequency carrier amplifier; 20mv to 10 v peak to peak input magnetic amplifier; 3.5 to 32v peak to peak pulse input; standard outputs linearized 0 to 10 vdc form 0.1% of reading over 20: 1; input range form 0.2% over 30 to 1 range; corrected pulse 0 to 2 khz; 10v p-p into 10k load

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
