Ac Voltage Rating:

120.0 volts

Frequency Rating:

60.0 hertz

Major Components:

Lap top computer w/monitor, computer program, interface/amplifier, and turbine meter manifold

Accessory Controlling Agency:

Aerospace guidance and meteorology center

Inclosure Feature:

Multiple item w/housing

Test Type For Which Designed:

Fuel flow calibration system for a/m99t-2 calibration trailer

Operating Test Capability:

Flow range of 0.5/250 gpm, temperature range of +40/140 degrees f., viscosity range 0.8/50 centistrokes

Phase:

Single

Special Features:

Part of the a/m99t-2 calibration trailer used for engine test cell calibration and repair, manifold consists of two turbine flow transmitters, one rated at 10/261 gpm the other at 0.5/ 20 gpm, a 10k ohm transmitter temperature, and a solenoid valve to differentiate flow transmitters.

Also includes 50 ft cable assembly

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-a
