Width:

24.000 inches

Length:

30.000 inches

Ac Voltage Rating:

Between 85.0 volts and 264.0 volts

Frequency Rating:

Between 47.0 hertz and 440.0 hertz

Major Components:

Digital display with multifunction keypad to select operations

End Application:

F-15 aircraft breathing oxygen system components

Electrical Power Source Relationship:

Alternate operating

Material And Location:

Steel housing

Inclosure Feature:

Multiple item w/housing

Test Type For Which Designed:

Calibrate transmitters rate of flow, 10 ccm, 100 ccm and 1 lpm

Phase:

Single

Special Features:

Test breathing oxygen system flow regulators and transmitters, displays temperature and flow; +/- 0.2 percent accuracy; materials aluminum, steel, copper and plastic

Functional Description:

Provides means to calibrate the flowmeters in the follow msogs test stands p/n 3300230-6001 oxygen regulator test stand, p/n 3300232-6001 inlet valve test stand, p/n 3301270-6101 msogs concentrator test stand, p/n 3301271-6101 ms0gs monitor test stand

Height:

10.000 inches

Reference Data And Literature:

T.O. 33d2-10-73-1, 33d2-10-74-1, 33d2-10-75-1 or 33d2-10-76-1 as reqd fapplicable test stand

Supplementary Features:

Flow calibration system

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T228-a
