Furnished Items:

Hoses and adapters

Portability Method:

Hinged external handles

End Application:

Tf34-ge-100a engine oil jets and passages

Product Name:

Flow tester assembly

Special Features:

Reads air flows in pounds per hour (60 pph gage) at regulated pressures up to 60 psig, has air in and out connections, storage for adapter hoses and fittings, can be used in shop or flightline, portable suitcase container

Functional Description:

Measures air flows at predetermined pressures to determine the leakage or blockage of the internal oil system components of aircraft engines

Supplementary Features:

Requires a lopac or a shop pressurized air supply

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23800
